Adaptive XDR Platform

CybrHawk | Transforming Cybersecurity

CybrHawk is an XDR (Extended Detection and Response) cyber security platform , providing visibility and threat detection across your network, endpoints, servers, cloud assets and third-parties in your supply chain. We deliver the paltform to you as fully managed service, with low cost and fastest enrollment time in the industry.

Key Diffirentiators

✓ One stop solution with rich functionality

✓ Any security data source can be integrated

✓ Continious assurance across all security domains

✓ Proactive Phishing Prevention

✓ Vendor Risk Detection

✓ Real Time Dark Web Monitoring

✓ Ongoing threat hunting to detect unknown

XDR Capabilities

Our XDR platform protects the entire enterprise, collecting information from all environments, including risks associated with your partners and suppliers. The platform correlates security events across all sources, and applies advanced machine learning to detect sophisticated threats and provide insights over the entire enterprise's digital footprint.

On-premise networks

Branch offices

Remote Workers

SaaS

Cloud

Custom apps

User Endpoints

Email

Dark Web

Why XDR?

These days, organizations are seeking for simple and effective solutions to detect threat across their entire digital footrint, presented by their on-premise locations, datacentres, cloud, and remote workers.

Most of the existing security solutions try to solve this problem from a particular angle, mplementing threat detection either at network, cloud, endpoint or perimeter level. Such systems become ineffective to detect modern sophisticated attacks when attackers move laterally between systems, evading traditional security defenses and eaving as little traces as possible.

Get Your Data to Work For You

Our unique XDR platform provides full cycle detection, investigation and response across your endpoints, servers, network, cloud workloads and enterprise SaaS Products.
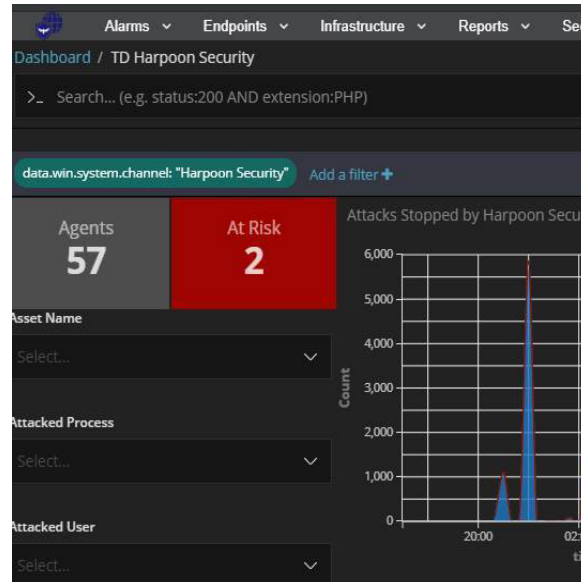

Connecting all security systems into a single platform provides great visibility, unprecendented threat detection perspective, and also establshes great context for proactive threat hunting and rapid incident response.

CybrHawk XDR platform truly makes your security data to work hard for you. We integrate all the security data you can possibly reach into, including data which directly resides within your network and on your enpoints, as well as the external data such as cloud workoads, SaaS applications, Dark Web breaches, compromised credentials, external vulnerabilities, and weaknesses and exposures related to third-party organisations in your supply chain.

We will pair our cyber security technology with trained and experienced security specialists who works 24x7x365 to deliver true cyber defense for your business. Our expert threat hunters gain insights from your security data, deep diving into any anomalies, suspicious events, and any unexpected behaviors observed on your network. As part of a threat hunt, we no find previously undetected threats, but also enhance your detection capability by adding new rules and fine tuning the platform to stay ahead of attackers.

We will completely integrate into your current workflows, and will follow your escalation procedures so you can counter a security threat before it causes any damage.

Continous Monitoring
We monitor security events and detect threats in real time, 24 hours a day.

Security Geeks
Our SOC can extend your existing team to keep you secure.

Real World Hunting
We know who is attacking you and what their next steps will be. It is not just alerts and thresholds.

Incident Response
Get an immediate help from world-class experts when every second counts.

Why Us?

Our Fusion Analytic Threat Platform offers a deep insight and help customers rapidly identify and respond to cyber threats at every stage of a possile attack, providing a secure and maintained environment for our customers. CybrHawk XDR also includes all the critical tools: IDS, intelligence risk, behavior, machine learning, cloud info, MDR, EDR, and Threat Hunting allows the organization to inherit ready-to-use tracking software and Advanced Visibility.

About CybrHawk

CybrHawk is a leading provider of information security-driven risk intelligence solutions focused solely on protecting clients from cyber-attacks. We also pioneered an integrated approach that provides a wide range of cyber security solutions for organizations of varying size and complexity. Our solutions enable organizations to define their cyber defences to prevent security breaches, detect real-time malicious activity, prioritize and respond quickly to security breaches, and predict emerging threats.
